CHEMICAL

EXCLUSIVE REPRESENTATION IN INDIA

Process Control and Visual Control System: Lumiglas Sight Glass Fittings, Lumistar Luminaires and Camera Monitoring Setup.

EPDM and PTFE/EPDM one to one replacement diaphragms for Bioengineering, Gemu, Burkert, Saunders etc. valves and Specialized Steam Gaskets.

Velon Industrial Inc. is a leading manufacturer of high technical flexible hoses and Gaskets.

A range of membrane filters manufactured in PES, PTFE, PVDF or Nylon & micron ratings from 0.1 to 1.0

Specializing in the production of sanitary valves, sanitary steel pipes, sanitary pipe fittings, steam valves, the products are mainly used in food, beverage, pharmaceutical and chemical industries.

World Largest manufacturers of sanitary pumps, valves and heat exchangers ASME BPE Tube fittings.

CSE Chiang Sung Enterprise Co., Ltd. is a Taiwan-based corporation with professional dedication in the manufacture and exporting of sanitary, pharmaceutical, and vacuum fittings business.

Rakean Inox is our in-house brand to provide the solutions for niche products which are globally hard-to-source by the process industry such as Vessel Lights, Fused Sight glasses, Sight glass fittings, Filter Housing and hose end connector.

InLine Technologies

PAPENMEIER

lumiglas[®]

SCHWERTE, GERMANY

Highly efficient Lumiglas components for optimally illuminating tanks, containers, agitators, separators, pipelines and other, generally closed, vessels in potentially explosive and other industrial facilities.

Product Range

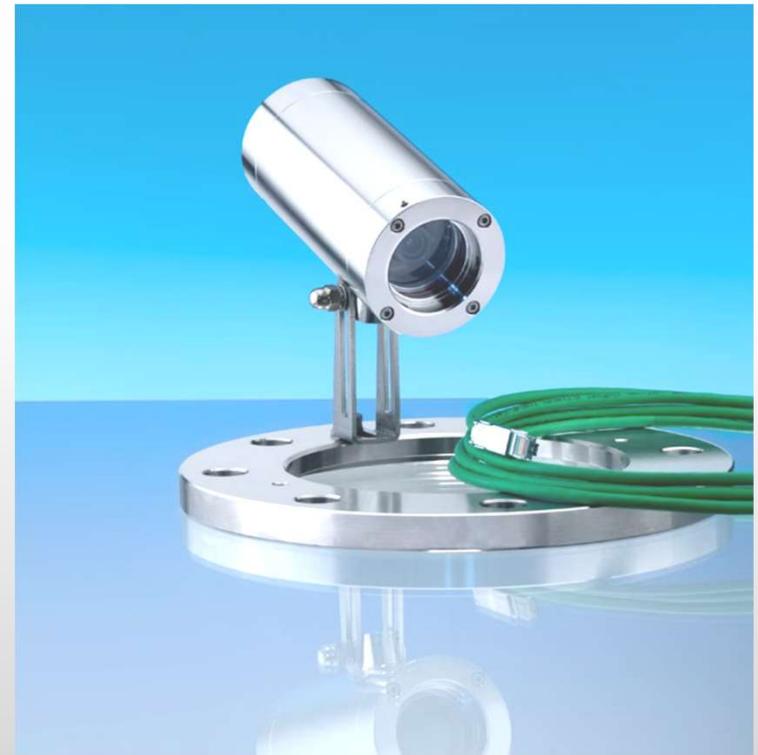

- ❖ Sight glass fittings and accessories
- ❖ Sight glass discs
- ❖ Sight glass luminaires LED
- ❖ Vehicle luminaires
- ❖ Ex camera systems

PAPENMEIER

lumiglas[®] SCHWERTE, GERMANY

- Camera with fixed lens K55-HD-Ex/K55-4K-Ex
- With these standard cameras, the lens is permanently adjusted to the object to be observed during installation (outdoor area/outdoor plant or process parts such as boilers or agitators).
- The VISULEX camera system is ideal for the inspection, documentation and remote monitoring of process operations in potentially explosive and aseptic environments.

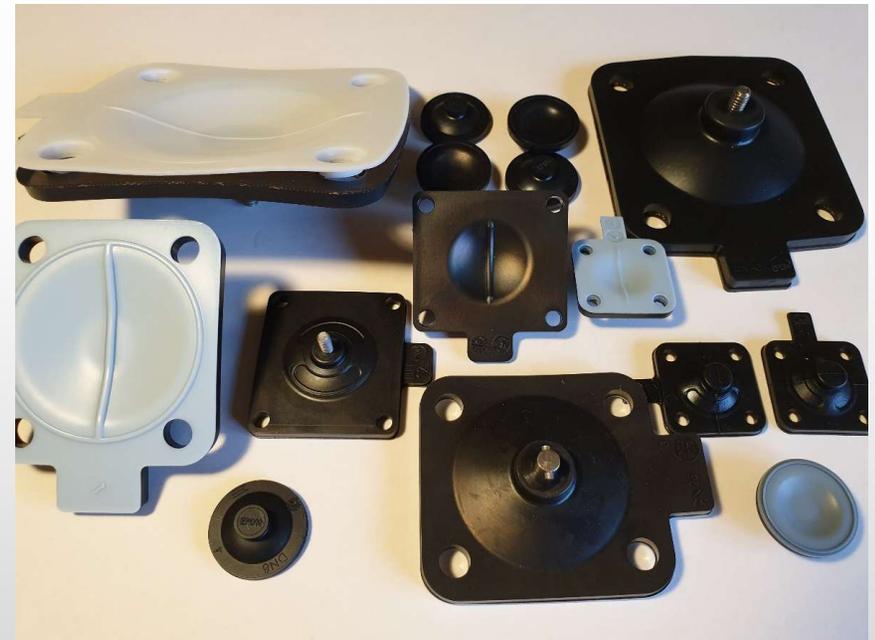

Seseca Inc. was founded in 2018 in the City of Zug / Switzerland

We are specialized in providing top quality consumables and spare parts for pharmaceutical/biotech facilities and we also provide a wide range of engineering assistance services for your projects or maintenance purposes.

Diaphragms for GEMÜ, SED, GF, Bioengineering valves, Saunders & Bürkert valve.

We produce EPDM and PTFE/EPDM diaphragms which are compatible with the most diaphragm valves

Our Head of Products has over 24 years experience in the pharmaceutical field and has worked globally with many big players in the pharmaceutical and biotech manufacturing field.

NEXT GENERATION TC-Gasket in PTFE-316L (Steam-Flon®)

These gaskets are made from a unique blend of non-pigmented PTFE and 316L stainless steel powder.

The mechanical properties of this compound are very interesting, because it eliminates the cold flow problems we experience with for example virgin PTFE.

Cold flow is the term we use for movement of plastic under permanent load/stress, a state that is used with static seals. At elevated temperatures, this effect is amplified. The gasket material is slowly moving towards the inside of the fitting and creates a bead. This bead leads to flow restriction and is a potential area for particles/bacterial entrapment. The Steam-Flon® material eliminates cold flow out of the equation, creating a very stable seal with no leaks even at large temperature fluctuations.

- Velon Industrial has been at the forefront of fluid handling solution professionally and offering high quality flexible hoses and customized fluid transfer production, that are widely used in food and beverages, pharmaceuticals.
- VELON pharmaceutical grade platinum vulcanized [silicone hose](#) has complete certifications, safety and reliability, and meets FDA, USP, BFR and other food and pharmaceutical certifications. It has the characteristics of high cleanliness, non-toxicity, and tastelessness. Used in high cleanliness industries such as food, beverage, cosmetics, pharmaceuticals, etc., [CIP and SIP](#) cleaning can be performed.
- We have successfully developed flexible hoses with a maximum of 100 meters to support a massive working pressure of 150000 psi, fire-rated hoses that can operate for 30 minutes in 800°C fire, blowout protection hydraulic control hoses and other products with extreme requirements.

Tri-Clamp Gaskets Features and Benefits:

- Made from platinum cured silicone resin.
- Hygienic Design and Smooth surface.
- Conforms to ASME BPE standard.
- Conforms to FDA 21 CFR 177.2600.
- Masters CIP- and SIP-cleaning processes.
- Available with other materials like PTFE, EPDM, FKM etc.
- Available with DIN 32676 and ISO standards.

PORE FILTRATION

Trowbridge, UK

- We offer liquid and gas filtration and separation solutions across the process industries, including food, water treatment, beverage, healthcare, digital ink, chemicals, compressed gases and venting.
- Our talented team of experienced filtration experts will work with you to achieve the lowest possible filter expenditure whilst maintain or improving performance.
- From cartridge filters, bag filters to carbon filters for existing systems, or filter housings for new projects, our team of filtration experts can source the right filtration products and solutions, at cost effective rates.

PORE FILTRATION

Trowbridge, UK

- All our filter products are manufactured to the highest quality standards with certificates of conformity and validation guides that can be provided upon request.
- All filters used in the food & beverage markets are EU and FDA compliant for material in food contact. Additionally certain products are Halal or Kosher certified.
- Filters for use in healthcare or pharmaceutical applications meet the requirements of US FDA 21 and evaluated in accordance with USP Class VI plastics.

Sterile Gas PTFE Membrane Filters

Product Concept
More Precision, Much
Better, All Made in Yuan!

Yuanan

The Sincerity Wins The Future

- Zhejiang Yuanan Liquid Equipment Co,Ltd, located in Wenzhou Binhai develop zone, with an building area of 56,000 m² , 220 employers, aimed to be a green, healthy, automatic, intelligent modernized factory.
- Yuanan mainly produce sanitary valves, sanitary pumps, sanitary tubes, sanitary fittings. Products are widely used in bio-tech, pharmaceutical, brewery, dairy, food & beverage, ice-cream, cosmetics, paintings, water treatment,etc.
- Yuanan workshops are equipped with imported world class CNC machines, and technical cooperation with Germany.
- Products are strictly according to ISO, DIN, ASME BPE, SMS, 3A standard, quality totally conform to industry standard.

InLine Technologies

KL KING LAI®

- ❖ KINGLAI Founded in 1991, in Taiwan is one of the world fastest growing manufactures for components and fitting in sanitary piping systems & vacuum technology systems.
- ❖ ASME BPE Certified Stainless Tubes & Fittings Manufacturer.
- ❖ KINGLAI Products meet all standard in ASME BPE, 3A, BS, ISO and DIN. KingLai is 3A & ISO 9001-2000 and ASME Bio Processing Equipment (BPE) certified manufacturer.

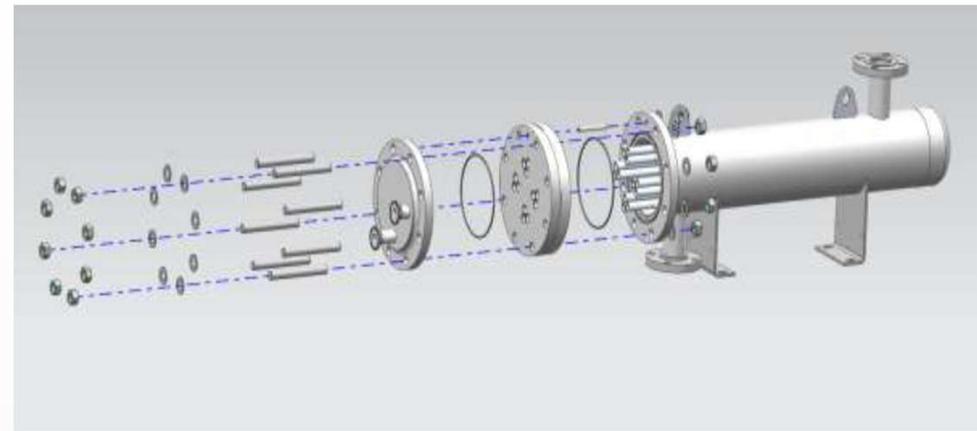

HEAT EXCHANGER:

KingLai could provide you the most suitable standard or customized heat exchanger model according to customer requirements. Process design can be carried out according to customer's given parameters. Accurately grasp thermal performance and balance pressure drop, to ensure the equipment can run stably under rated working condition.

SANITARY PUMPS:

KingLai Group's centrifugal pumps include KL-C Series Sanitary Centrifugal Pumps and KL-S Series High-efficiency Centrifugal Pumps. Through targeted selection, the two types of centrifugal pumps can be applied in almost all the scenarios requiring sanitary conveying.

- CSE Chiang Sung Enterprise Co., Ltd. is a Taiwan-based corporation with professional dedication in the manufacture and exporting of sanitary, pharmaceutical, and vacuum fittings business.
- CSE was founded thirty years ago by a group of specialists with years of experience in product research, design, management and quality control. The company now is located in Changhua County, the center of Taiwan. Mr. Roger Shi is the great wizard behind the curtain who started from stone and sand since 1993.

BPE Pharmaceutical / Biotechnology Fitting & Tube

CSE offer series of high capacity product in pharmaceutical flowing control system, we use the special material on BPE welding: low sulphur ASTM SS 316L, $S \leq 0.005\% - 0.017\%$ which meets the standard of orbital welding. We also offer electro-polished in ID to satisfy your demands.

CSE HIGH PURITY TUBE & FITTING VALVE (ASME BPE STANDARD)

Pharmaceutical/Biotechnology fitting. CSE have over 15 years hygienic fitting experiences for developing out the ASME bioprocessing equipment (BPE) standard tube, fitting, valve components for high purity application such as water for injection, pharmaceutical, cosmetics use. Material : low sulphur ASTM SS316L, $S : \leq 0.005\% \sim 0.017\%$,

Rakean is our in-house brand to provide the solutions for niche products which are globally hard-to-source by the process industry.

Rakean Inox™ Luminaires, Engineered for demanding industrial environments, the Rakean Inox™ Luminaire is specifically designed to meet the rigorous requirements of tank illumination.

Its robust construction and versatile design make it ideal for installation on both sight glass and light glass assemblies, ensuring reliable visibility and safety in critical process conditions.

Rakean provides a range of fused sight glass as per the specifications of ASME BPE and other sight glass fittings as per 3A standard.

Ranges of 316 or 304 housings for cartridges filters in hygienic liquid, air or vent applications.

Rakean Provides wide range of the Hoses End Connectors.

All materials are quality checked by our Quality control personnel to ensure highest level of quality parameters and certifications, marked and packed as per prescribed standards.

OUR SERVICES

SERVICES:

InLine Technologies will provide the advantage of swift & prompt services right enduser location with technically trained personnel.

LOCAL INVENTORY:

InLine Technologies maintains a substantial local inventory base in India with almost the complete product range of all our partners.

LOCAL TECHNICAL SUPPORT:

InLine Technologies has a pan India presence, and we can provide assistance on every aspect of our product line locally through our local product specialists.

LOCAL COMMERCIAL & LOGISTICS SUPPORT:

When time of delivery becomes critical, InLine Technologies' constantly updated local inventory helps us provide instant deliveries to customer at affordable price points as per customer requirements.

OUR TEAM

We have a team of dedicated professionals which constitutes of

- Sales & Product Specialist – 06 Nos
- Service Support Specialist – 03 Nos
- Back Office Support - 02 Nos
